

# Spring 1 2019 Year 1 & 2

Our topic this term was 'Toys' and the children have thoroughly enjoyed this topic.

The children have developed their design and making skills in order to make a range of puppets. We are so proud of how hard they have all worked to develop their sewing skills.

The children explored how toys have changed over the years. They each visited our four classrooms to find out about what toys are made of, how technology has changed and they have talked about which toys they like to play with now.

In January Mrs Higgins went to India as part of our school international link. We had a whole week of India focused activities.

The children loved discussing different words to describe the Indian food they tasted.
