Remote Learning Year 4

Monday 19th July

# Animal Antics

As we can't go to Yorkshire Wildlife Park, we have planned a WILD day for you!

Firstly, take a virtual trip at San Diego Zoo and Chester Zoo. There's lots of live web cams and pre-recorded talk with keepers in with the animals that you can watch.

https://zoo.sandiegozoo.org/live-cams

https://www.chesterzoo.org/virtual-zoo-2/

Your tasks are:

1. Choose your favourite animal and research it thoroughly. You then need to present this information in whatever way you choose – it could be a video presentation, Power Point, written report, annotated drawing or something else!

2. Design and make a wildlife park enclosure for you animal. You will need to think about your animal's behaviour, habitat and diet. You could make it out of Lego or cardboard boxes, draw and label it, or make it virtually online.

3. Data handling – Use the information here https://www.yorkshirewildlifepark.com/things-to-do/animals/ about the animals at Yorkshire Wildlife Park to create a bar chart or pictogram to show either how many animals come from each continent or how many animals are herbivores, carnivores or omnivores. You can draw your graph by hand or use 2graph or 2count in the mathematics section on Purple Mash to record your results.

There's also some games to have a go at here
